Early Detection Pancreatic Cancer Clinic

Our Goal is Pancreatic Cancer Early Detection or Prevention

...by ensuring that individuals at increased risk for pancreatic cancer get the care they need through increased screening, risk-reduction strategies, and engagement in research.

Who May Benefit

- Individuals with a family history of pancreatic cancer, especially in a close relative or multiple family members
- Carriers of a gene mutation linked to an increased risk for pancreatic cancer (such as ATM, BRCA1/2, CDKN2A, PALB2, or Lynch syndrome)
- Individuals concerned about their risk to develop pancreatic cancer

What We Offer

- Pancreatic cancer risk assessment & evaluation by our dedicated pancreas specialist team
- Genetic counseling and testing, if indicated
- Personalized pancreatic cancer screening and risk-reduction plan, which may include imaging, bloodwork, and/or lifestyle modifications
- Opportunity to be involved in research related to pancreatic cancer risk factors and early detection

Our Team

- Melissa Pietro, PA-C — Advanced Practice Provider
- Julia Lanza, MS, CGC — Genetic Counselor
- Takiyyah Hamilton, MPH — Clinical Research Coordinator
- Andrew Page, MD, FACS — Medical Director/Surgical Oncologist
